

Installing pciXpress

pciXpress is available for PCI providers with an Apple iPhone or iPad. It will work on a 5th Generation (5G) iPod Touch with 512 MB of available Ram/memory. It will also work on many Android phones/tablets with Android version 2.1 or higher, including the Amazon Kindle Fire and the Google Nexus tablet.

iPhone users:

1. Go to the "App Store" app on your iPhone
2. Search for pciXpress
3. Install this free download

iPad users:

1. Go to the "App Store" app on your iPad
2. Search for pciXpress
3. **Important: Tap the "iPhone Apps" tab on the top of the search screen**
4. Scroll down to find pciXpress and install this free download
5. Once pciXpress is installed on your iPad, tap the 2X button on the lower right corner of the screen to enlarge the app into iPad viewing mode

Android users:

(works on many "Android version 2.1 or higher" devices including the Kindle Fire and the Google Nexus). Note: Minute Menu will provide pciXpress support for only the Kindle Fire and the Google Nexus family of Android devices.

1. Go to the Google "Play Store" app on your Android phone or tablet
2. Search for pciXpress
3. Install this free download

For Kindle Fire users:

1. Tap on the "Apps" link across the top of the Home screen
2. On the next screen, tap on the link called "Store"
3. Search for pciXpress
